Vertabase 4 Operates with Tools People Use to Create Easy Project Management

OAK PARK, MI, Sept. 25, 2007 - Vertabase, a leading developer of project management software, today officially launched Vertabase 4 - its newest platform for project management.

Vertabase 4 offers project management tools that accelerate productivity by simplifying and centralizing access to project information and metrics. With Vertabase 4, people can enter information via a range of software applications, manage projects, share reports and then export, share and manipulate these reports with third party applications. Vertabase 4 delivers a simple, intuitive and powerful tool set for both technical and non-technical users.

Principal features of Vertabase 4 include:

- Rapid project set-up
- Import of schedules and tasks from Microsoft Excel and Google spreadsheets
- Export of tasks and projects to Microsoft Outlook and Google Calendar
- Generation of reports to Adobe PDF
- Integration with Adobe Acrobat - including ability to launch net meetings with Acrobat Connect

"By operating with standard and emerging software applications, Vertabase 4 makes it easy for people to use powerful project management tools," said Mark Phillips, CEO, Vertabase. "People can track, manage and collaborate on projects regardless of their technical background. Vertabase 4 marries top-rated project management with tools people already use to create productivity gains for enterprises without burdening end-users," Mr. Phillips added.

Vertabase 4 is written in Adobe ColdFusion and uses AJAX, JavaScript and Flash Video in its interface. Vertabase 4 is compatible with Internet Explorer, Safari, Mozilla Firefox and runs on both Windows and Mac OS. Vertabase 4 is available as a Software as a Service, or installable on customer servers running Microsoft IIS or Apache on Windows servers. Vertabase 4 uses a Microsoft SQL database.

About Vertabase

Vertabase's flagship product, Vertabase 4, is a best-in-class project management software solution. Vertabase's unique design and approach make powerful, results-oriented project management tools accessible to non-technical enterprise users.
