Press Release

Fiserv FSC Insurance gains visibility and cost savings through better project management

Vertabase® Pro optimizes workload per person

OAK PARK, MI, May 3, 2006 - Vertabase, a leading developer of productivity-enhancing software solutions, today announced that FSC Insurance Solutions, a full-service provider of personal lines rating solutions for the insurance industry and a business unit of Fiserv, Inc. (NASDAQ: FISV), has successfully implemented Vertabase Pro software.

Vertabase Pro organizes people and projects by simplifying, centralizing and accelerating access to critical up-to-date information. Vertabase Pro facilitates management by providing a framework for increased productivity.

Traditionally, FSC Insurance Solutions updated its insurance rating software twice monthly. It was a time- and resource-consuming process. Complex changes could take up to 100 hours to complete and updates accounted for up to 2,000 person hours per month. The company was looking for new ways to increase overall project management efficiency. Centralized and transparent tracking was needed to reduce the volume of e-mail, phone calls and face-to-face meetings that were obstacles to productivity.

FSC Insurance Solutions implemented Vertabase Pro as a central repository for all project information. Project managers, developers, programmers and quality assurance experts now have immediate access to centralized and up-to-date information.

Since implementing Vertabase Pro, project managers at FSC Insurance Solutions have been able to evaluate and optimize the workload-per-person with much greater accuracy. In addition, programmers and quality assurance experts immediately saw the benefits from simplified time management and enhanced individual productivity.

"Moving from one task to another is much more efficient than before," said Melody Johnson, Executive Vice President, FSC Insurance Solutions. "Now we are able to

effectively track new and outgoing projects while having a better understanding of resource availability. From the development cycle to testing and deployment, our Project Managers are better equipped to keep projects on schedule. Vertabase Pro has proven to be a very solid investment."

"FSC Insurance Solutions is now saving about \$8,500 per software update thanks to Vertabase Pro," said Mark Phillips, CEO, Vertabase. "That's \$17,000 a month and more than \$200,000 a year. These are strong numbers that clearly illustrate the value and demonstrate the ROI of our product."
