## Vertabase releases Version 4.5 of Project Management Software

Adobe ColdFusion-based Vertabase software enhances ease-of-use, data visualization and data portability

**OAK Park, MI, Dec. 3, 2008** - Vertabase, developers of the world's leading ColdFusion-based project management software, today officially launched Vertabase 4.5 – the latest version of Vertabase project management software. (For a screenshot tour, please see [http://www.vertabase.com/tour\\_manage\\_report.html](http://www.vertabase.com/tour_manage_report.html).)

Vertabase 4.5 creates an innovative rich Internet application experience that accelerates productivity by simplifying access to information. Users can easily import/export data, visualize data in a variety of ways and port data to a range of formats for easy sharing. Vertabase 4.5 delivers a simple, intuitive and powerful tool set for users of all backgrounds.

New features of Vertabase 4.5 include:

- New Ways to Access and Visualize Information:
  - o New Interface – Sleeker and cleaner, new colors and tabs provide access to main sections, requiring fewer clicks for successful navigation
  - o Report 'PopOuts' make information portable whether in or out of the application or browser
  - o 'Resource Calendar' displays tasks with timelines represented by color bars in week or multi-week view
- New Ways to Enter and Update Information:
  - o Enhanced Microsoft Excel import and data rich templates
  - o Faster timesheet entry
  - o Single click input of percent complete
- New Ways to Track, Share and Control Information:
  - o Change request system offers tighter controls for updating tasks
  - o Microsoft Outlook event creation from within Vertabase
  - o Improved cost tracking for easy profitability analysis – without creating a budget

"Today, more than ever, people need to do more with existing resources," said Mark Phillips, CEO, Vertabase. "Having project information at their fingertips makes people more efficient. Vertabase 4.5 makes it easy to manage data in a meaningful context. Using ColdFusion and the latest rich Internet application approaches, Vertabase focuses on ease-of-use, visibility, sharing and data portability – the foundations of increased productivity. For us, version 4.5 is the latest step in our continuing commitment to deliver powerful, but intuitive, project management tools," Mr. Phillips concluded.

Vertabase 4.5 is written in Adobe ColdFusion with a Microsoft SQL database. Creating a rich Internet application experience, Vertabase 4.5 uses AJAX and HTML in the interface, and Flash for an enhanced training and e-learning experience. Vertabase 4.5 is compatible with Internet Explorer, Safari, Firefox and Chrome on both Windows and MAC, and is available as Software as a Service or as an application running on customers' servers.

### About Vertabase

Vertabase is the developer of the world's leading Adobe ColdFusion-based project management software. Vertabase 4.5's unique rich Internet application approach makes powerful, results-oriented project management tools accessible to non-technical users. Vertabase 4.5 features include: resource planning, project tracking, online timesheets, project dashboards and online document management. Vertabase is an Adobe Solutions Partner. Founded in 1997, Vertabase is headquartered in Oak Park, MI. For more information, please visit <http://www.vertabase.com>.
